

Bridging Digital

The project 'Digital Art Academy - cultural education for digital skills' aims to support the growth and intertwining of digital and creative competences for both adult educators and artistic professionals. It will bring together adult educators with creative practitioners who, in cooperation with multimedia experts, will use digital technologies to create new art forms.

Project results

- growth in the digital and creative competences of the project participants
- competence levels of those who are recipients of trainings developed out of the project's intellectual outputs.
- development of adult educators' competences to create course material and teach course content on the topic of the use of digital tools in artistic production and broadcasting.

Project milestones:

- Repository of good practices of each country
- Written/digital presentation of four case studies which describe each partner's local level experiments in using digital technologies in the development and broadcasting of the performing arts in different geographical and socio-economic situations.
- Publication presenting a set of curriculum guidelines formulated as key ingredients for educators to include when they are creating short courses and curricula directed towards creative professionals who wish to digitally upskill.
